Our office is committed to providing you the most advanced products and services available. While we offer you the latest in contact lens technology, we try not to forget your fashionable side. Like many patients, you are probably content with your natural eye color, but what if you could enhance your appearance and try something different?

With FreshLook®, the #1 selling color contact lens in the US, you can choose from a wide range of shades that blend beautifully with the natural color of your eyes. For dark eyes or light, we can

offer you a world of colors to explore.

Visit www.freshlookcolorstudio.com today where you can virtually “try-on” different shades of contact lenses at the FreshLook Color Studio™. Find a favorite photo of you looking your best and print off your favorite look. Bring it to us and together we’ll determine if FreshLook is right for you.

All recipients of a free pair of FreshLook® Color contact lenses must have a contact lens exam and fitting. Additional charges may apply. Contact your eye care provider for an appointment today!
